A'van... Others Follow !

The A'van Advantage:

- * Less Maintenance !
- * Easy to clean !
- * Greater impact Resistance !
- * Virtually resistant to dents !
- * Higher Insulation Properties !

AUSTRALIAN INNOVATION, EUROPEAN STYLING

Centurion Chassis

Unique to A'van, the **Centurion Chassis** offers superior support to our RVs than all others. Hot-dipped galvanized steel ensures that your A'van will remain protected from corrosive elements that can fatigue other types of chassis without maintenance. Intelligent engineering design maximizes strength and resistance to torsion and compression via pressed hole cross-members, while enabling greater protection to electrical wiring running underneath your van. For your long-term peace of mind, choose the A'van **Centurion Chassis**.

Leading-Edge Euro Construction

A'van incorporates our own **Leading-Edge Euro Construction** process to the interior furniture of all our vans. The enduring style of solid timber construction is enhanced by state of the art edge-banding technology, producing the most sophisticated and appealing living environment. Fine craftsmanship and superior technology ensures the A-Grade finish expected with A'van, while versatile daytime/night configuration allows you to enjoy greater comfort in your home on wheels.

Super-Strength Smooth Panel Construction

A'van has more experience than any other Australian RV manufacturer in sandwich panel wall construction. For more than 12 years, A'van has applied panel bonding methods to all of our vans. A'van's unique Super-Strength Smooth Panel Construction combines superior strength, insulation and exterior finish while our ply-reinforced aluminium outer skin ensures superior dent resistance.

Augmented Power Supply

Every A'van Euro Star features the most advanced electrical system for maximum utility, wherever your adventures take you. Our top of the range AC Delco 100 Amp/hour battery pack and 18 Amp charger & power supply, including battery level indicator and water level indicator*, give you peace of mind and confidence even in remote destinations.

Remember - Only A'VAN offers you the CHOICE of Smooth Aluminium Or Fibreglass Panels!

Our construction process incorporates 25mm styrene foam insulation, 2 x layers ply and your choice of smooth prepainted aluminium or fibreglass outer panels. *The choice is yours!*

*A'van recommends prepainted aluminium side panels due to ali's unique benefits over fibreglass, including weight per square metre, surface appearance, UV-resistance, low dirt-retention and ageing resistance.
